To our Customers:--

In presenting this Supplementary List, we especially call your attention to the latest novelties, and choicest varieties contained therein. These are in addition to our general catalogue sent heretofore. If it has been lost or mislaid, kindly advise and we will forward another. There is evidence that the new introductory of American origin, are fast superseding those of Europe, and only the future can predict what wonderful strides will be made along these lines. Fifteen years ago, a six inch flower was considered phenomenal and a variety, but by wonderful hybridization, the size has been increased to nine and ten inches. Our American product being thoroughly acclimated both by soil, and climate conditions, thrive better, grow larger and are superior in many ways. We feel confident that our customers will feel well repaid with a trial of some of these new varieties. The stock being extremely limited, we advise you to order early. Our exhibit of Prize Medal Dahlias was awarded the Grand Prize at the Panama Pacific International Exposition at San Francisco, California in 1915, and we intend to still improve our Collection by the addition of every novelty of Superior Merit.

Most Respectfully Yours,
FORBES & KEITH.
